Rahim Yar Khan, Punjab, Pakistan

misterhamza117@gmail.com | [linkedin](#) | [github](#) | [Portfolio](#)

PROFILE SUMMARY

Recent IT graduate with proven full-stack development skills, specializing in React and C# .NET frameworks. Possessing hands-on experience in building scalable web applications, RESTful APIs, and robust .NET-based systems, including an internship at Alexa IT Solutions. Adept at deploying real-world projects, I bring a strong foundation in modern web architectures and a proactive approach to software development.

EXPERIENCE

Full Stack Developer Intern

June 2026 – Aug 2026

Alexa IT Solutions

Rahim Yar Khan, Pakistan

- Developed and maintained responsive web applications for Alexa IT Solutions, leveraging modern front-end frameworks like React and robust back-end APIs built with C# .NET.
- Participated in agile development cycles, assisting in SQL Server database schema design, debugging, and optimizing C# .NET codebase to improve system performance.
- Integrated third-party services and assisted in application deployment on Microsoft Azure, ensuring secure and seamless user experiences for Alexa IT Solutions' clients.

Software & Web Developer

2024 – Present

Freelance, Alongside undergraduate studies

Rahim Yar Khan, Pakistan

- Successfully delivered web projects for clients, utilizing C#/.NET, Java, and modern web frameworks like React, ensuring robust full-stack solutions.
- Engineered secure microservices and robust database systems using C#, PostgreSQL, and SQL Server, focusing on scalability and data integrity.
- Developed high-performance, responsive web applications leveraging React, TypeScript, and modern UI libraries to meet diverse client requirements.
- Integrated Machine Learning models and data analysis pipelines for automated decision-making platforms, showcasing adaptability in complex problem-solving.

LEADERSHIP & EXTRACURRICULAR

President (ITEC Society)

Jun 2024 – Jun 2026

Khwaja Fareed University of Engineering and IT (KFUEIT)

Rahim Yar Khan, Pakistan

- Directed society operations and managed multidisciplinary student teams in organizing university-wide technology competitions, developer workshops, and seminars.
- Acted as the main link between students, IT faculty, and outside tech companies to keep the department active and drive engagement.
- Oversaw event logistics, resource allocation, and team execution under tight deadlines, developing strong project management and communication capabilities.

TECHNICAL SKILLS

Languages	C#, TypeScript, JavaScript (ES6+), Python, PHP, Java, SQL
Frameworks	React, .NET Core / ASP.NET, Next.js, Node.js, Express, Tailwind CSS, Bootstrap
Databases	SQL Server, PostgreSQL, Supabase, MySQL, Firebase, MongoDB
Web	REST APIs, Webshop Development, Multi-Region Architectures, Third-Party APIs
Cloud & Tools	Microsoft Azure, AWS, Docker, Git/GitHub, n8n, SEO
Methodologies	Agile, Scrum, Software Development Life Cycle (SDLC)
Data Science	Machine Learning Algorithms, Data Analysis (Pandas, NumPy, scikit-learn)

PROJECTS

PhysioRehab (.NET Rehab Management System) | *C#, .NET Core, SQL Server, Clean Architecture*

Engineered a robust healthcare rehabilitation platform leveraging C# .NET Core and SQL Server, in collaboration with a DTU student. Developed core features enabling physiotherapists to assign personalized exercise plans and monitor therapy sessions, ensuring secure data storage and adherence to clean architecture principles.

Orespark (Multi-Region E-Commerce Platform) | *React, TypeScript, Supabase, Tailwind CSS*

Engineered a scalable webshop supporting operations across Pakistan, Saudi Arabia, and the USA with multi-currency support. Built a comprehensive admin dashboard to manage revenue analytics, bulk orders, and role-based access, alongside key third-party API integrations (WhatsApp, Meta Pixel, courier services).

NextGenHire (AI Automated Hiring Platform) | *Python, React, PostgreSQL, AI Models, Stripe* [Live Project](#)

Engineered an AI-automated hiring platform utilizing Python-based web scrapers and natural language processing models to analyze applicant data, automate candidate assessments, and power interactive conversational systems.

SoloScan (AI Code Reviewer & Analyzer) | *React, TypeScript, Stripe, Supabase, AI/ML APIs* [Live Project](#)

Developed an intelligent code analysis platform using ML model integrations to offer instant debugging, code quality metrics, and algorithmic optimization recommendations in real-time.

LoRA Fine-Tuned Generative Diffusion Model | *Python, PyTorch, Diffusers, PEFT, BLIP*

Built an end-to-end generative AI pipeline using PyTorch and Hugging Face: automated dataset captioning with BLIP, fine-tuned Stable Diffusion v1.5 UNet layers via LoRA (PEFT), and deployed a custom text-to-image inference pipeline.

EDUCATION

Khwaja Fareed University of Engineering and Information Technology (KFUEIT) Sep 2022 – Jun 2026
Bachelor's in Information Technology *Rahim Yar Khan, Pakistan*

CERTIFICATIONS

Frontend Developer (React) | [Verify](#) *HackerRank*
Skills Gained: *React, Frontend Architecture, Component-Based UI*

Integrating Generative AI into Project Management | [Verify](#) *Vanderbilt University*
Skills Gained: *Generative AI, Project Management*

Google Cybersecurity Professional Certificate (In Progress, 6/9 Courses) *Google*
Skills Gained: *Network Security, Threat Detection, Risk Management, AI in Cybersecurity*
