

Muhammad Hamza

Full-Stack Web Developer | Location: Rahim Yar Khan, Punjab, Pakistan

Email: misterhamza117@gmail.com | Phone: +92 345 8017028 | Portfolio: <https://www.mrhamza.dev>

PROFILE SUMMARY

Recent IT graduate with hands-on freelance experience building scalable webshops, full-stack web platforms, Machine Learning models, and .NET-based systems. Comfortable across modern web architectures, Python, and AI integrations, with a track record of independently deploying real-world projects.

TECHNICAL SKILLS

Web & E-Commerce: Webshop Development, Multi-Region Architectures, REST APIs, Third-Party APIs

Methodologies: Agile, Scrum, SDLC

Languages: TypeScript, JavaScript (ES6+), C#, Python, PHP, Java, SQL

Frameworks & Platforms: React, Node.js, Next.js, Express, .NET Core / ASP.NET, Tailwind CSS, Bootstrap

Data Science & ML: Machine Learning Algorithms, Data Analysis (Pandas, NumPy, scikit-learn)

Databases: PostgreSQL, Supabase, MySQL, SQL Server, Firebase, MongoDB

Tools: Git/GitHub, Docker, n8n, SEO, Microsoft Azure, AWS, Anaconda

EXPERIENCE

Full Stack Developer Intern — Alexa IT Solutions (June 2026 -- Aug 2026)

- Developed and maintained responsive web applications, collaborating with the engineering team to build intuitive front-end interfaces and robust back-end APIs.
- Participated in agile development cycles, assisting in database schema design, debugging, and optimizing codebase to improve overall system performance.
- Integrated third-party services and assisted in application deployment, ensuring secure and seamless user experiences.

Software & Web Developer — Freelance (2024 -- Present)

- Helped local and international students with web-related projects utilizing C#/.NET, Java, and modern web frameworks.
- Designed and integrated Machine Learning models and data analysis pipelines for automated decision-making platforms.
- Engineered secure microservices and database systems using C#, Python, PostgreSQL, and Supabase.
- Developed high-performance, responsive web applications leveraging React, TypeScript, and modern UI libraries tailored to complex client requirements.
