PROFILE SUMMARY

Full-Stack Engineer with strong expertise in Next.js, React, Node.js, and modern web architectures, complemented by hands-on experience integrating AI/ML models and deploying scalable applications on Microsoft Azure and cloud platforms. Proven track record of independently delivering high-performance web applications, e-commerce platforms, and intelligent automation systems.

EXPERIENCE

Full Stack Developer Intern

Alexa IT Solutions

June 2026 – Aug 2026

Rahim Yar Khan, Pakistan

- Developed and maintained responsive full-stack web applications utilizing React, Node.js, and modern JavaScript/TypeScript, collaborating with engineering teams to build intuitive interfaces and robust backend APIs.
- Participated in agile development cycles, contributing to database schema design, debugging, and optimizing codebase performance across distributed environments.
- Integrated third-party cloud services and assisted in cloud application deployments, ensuring secure, scalable, and seamless user experiences.

Software & Web Developer

Freelance, Alongside undergraduate studies

2024 – Present

Rahim Yar Khan, Pakistan

- Engineered high-performance, responsive full-stack applications leveraging Next.js, React, TypeScript, and Node.js tailored to complex client specifications.
- Designed and integrated Machine Learning models and AI workflows into full-stack web platforms for automated decision-making and intelligent code analysis.
- Built secure microservices, REST APIs, and robust data layers utilizing MongoDB, PostgreSQL, and Supabase deployed across cloud environments.
- Delivered tailored web solutions and multi-region e-commerce architectures utilizing modern web frameworks and cloud infrastructure.

LEADERSHIP & EXTRACURRICULAR

President (ITEC Society)

Khwaja Fareed University of Engineering and IT (KFUEIT)

Jun 2024 – Jun 2026

Rahim Yar Khan, Pakistan

- Directed society operations and managed multidisciplinary student teams in organizing university-wide technology competitions, developer workshops, and seminars.
- Acted as the main link between students, IT faculty, and outside tech companies to keep the department active and drive engagement.
- Oversaw event logistics, resource allocation, and team execution under tight deadlines, developing strong project management and communication capabilities.

TECHNICAL SKILLS

Core Stack	Next.js, React, Node.js, MongoDB, Microsoft Azure, TypeScript, JavaScript (ES6+)
Web & Architecture	REST APIs, Microservices, Multi-Region Architectures, Third-Party APIs, Tailwind CSS
Methodologies	Agile, Scrum, Software Development Life Cycle (SDLC)
Languages	TypeScript, JavaScript (ES6+), Python, C#, PHP, Java, SQL
Data Science & AI	Machine Learning, AI Model Integration, Data Analysis (Pandas, NumPy, scikit-learn)
Databases	MongoDB, PostgreSQL, Supabase, MySQL, SQL Server, Firebase
Tools	Git/GitHub, Docker, n8n, Microsoft Azure, AWS, Anaconda, SEO

PROJECTS

NextGenHire (AI Automated Hiring Platform) | *Next.js, React, Node.js, Python, PostgreSQL, AI Models* [Live Project](#)

Engineered an AI-automated hiring platform leveraging Next.js and Node.js backends integrated with Python-based web scrapers and natural language processing models to analyze applicant data and automate candidate assessments.

SoloScan (AI Code Reviewer & Analyzer) | *Next.js, React, TypeScript, Node.js, MongoDB, AI/ML APIs* [Live Project](#)

Developed an intelligent code analysis platform utilizing Next.js and modern API architectures with ML model integrations to offer instant debugging, code quality metrics, and algorithmic optimization recommendations.

Orespark (Multi-Region E-Commerce Platform) | *React, TypeScript, Node.js, MongoDB, Tailwind CSS*

Engineered a scalable full-stack webshop supporting operations across multiple regions with multi-currency support, a comprehensive admin dashboard for revenue analytics, and third-party cloud service integrations.

PhysioRehab (.NET Rehab Management System) | *C#, .NET Core, SQL Server, Clean Architecture*

Engineered a healthcare rehabilitation platform in collaboration with a DTU (Denmark) student enabling physiotherapists to assign exercise plans and monitor therapy sessions with secure data storage.

LoRA Fine-Tuned Generative Diffusion Model | *Python, PyTorch, Diffusers, PEFT, BLIP*

Built an end-to-end generative AI pipeline using PyTorch and Hugging Face: automated dataset captioning with BLIP, fine-tuned Stable Diffusion v1.5 UNet layers via LoRA (PEFT), and deployed a custom text-to-image inference pipeline.

EDUCATION

Khwaja Fareed University of Engineering and Information Technology (KFUEIT) Sep 2022 – Jun 2026
Bachelor's in Information Technology *Rahim Yar Khan, Pakistan*

CERTIFICATIONS

Frontend Developer (React) | [Verify](#) *HackerRank*
Skills Gained: *React, Frontend Architecture, Component-Based UI*

Integrating Generative AI into Project Management | [Verify](#) *Vanderbilt University*
Skills Gained: *Generative AI, Project Management*

Google Cybersecurity Professional Certificate (In Progress, 6/9 Courses) *Google*
Skills Gained: *Network Security, Threat Detection, Risk Management, AI in Cybersecurity*
